

X-10 VersaVent Non Profile Specific Ridge Vent

Features / Application / Technical Info.

- - Can be used to vent the ridge line as well as an endwall
 - Sold by the piece
 - Length Per Piece = 10 feet 0 inches
 - Not panel specific. Fits all panel models with rib height of 1" max
 - Available in two thicknesses:
 - 1" Thickness: For panels with a 3/4" high rib height or less (Examples from our panel models would be Imperial Rib, Ameri-Drain & Corrugated panels)
 - 1-1/4" Thickness: For panels with a 7/8" to 1" rib height (Example from our panel models would be SL-16 panel)
 - Factory-applied adhesive on one side for easy, one person installation
 - Will not blow away during installation (adhesive)
 - Meets all building codes
 - Prevents insect, animal, snow and wind-driven rain infiltration
 - Must be installed on both sides of the ridge. Calculate total linear footage required accordingly.
 - Example 1: Ridge = 50 ft. Order 10 pieces (you will not have any extra at the end).
 - Example 2: Ridge = 74 ft. Order 15 pieces (you will have 2 extra feet leftover).

- **99% recovery after compression**
